COMPASSITES IS BUILT FOR INNOVATION

OUR RESULTS ARE PROVEN AND POWERFUL

Some companies talk about success in terms of revenue or profit. We care about one thing -- outrageously satisfied customers. It's no wonder that we've continued to be the market leader in delivering innovative solutions to some of the world's most complex problems. When you have the will, we find the way forward. Every time.

WE DO 5 THINGS REALLY WELL

Some companies claim to do everything. We sometimes wish we were those guys. But by limiting what we do, we focus enough to do it so much better than anyone else.

DIGITAL EXPERIENCE MANAGEMENT

1

You call it a website or a portal. To us it is so much more – Target audiences, user journeys, content creation & management, platform implementation, governance, support and real-time metrics and analytics.

ENTERPRISE MOBILITY

2

Times are changing. Mobility is the new mode of enterprise scalability. We provide mobility consulting, enterprise and consumer mobile app development, and mobile testing.

SOLUTIONS DEVELOPMENT

3

We know clouds and development protocol. It's

about security and compliance, architecture

design, and "codesmithing" to deliver impressive

results.

BIG DATA & ANALYTICS

4

Our models are sexy as hell. Maybe that's because

we're experts at data visualization, segmentation,

social media and predictive analytics.

TESTING

5

Good solutions are tested solutions --

which is why we take our automation,

performance, and security testing

seriously.

TRUSTED BY THE PLANET'S MOST IMPORTANT BRANDS

The measure of any great company is who looks to them for help.

We are proud of our rich success in delivering fresh, market disrupting solutions for some of the coolest companies anywhere. From billion-dollar startups to the trendiest news platforms, from legendary pharmaceutical brands to the leading global Index provider, Compassites is the company to call when success is your only option.

We listen, learn, and lead.

MANAGED TESTING

Good solutions are tested solutions -- which is why we take our automation, performance, and security testing so very seriously. We obsess about perfection.
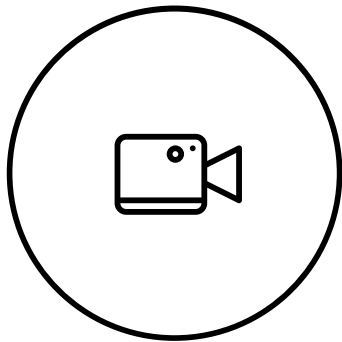

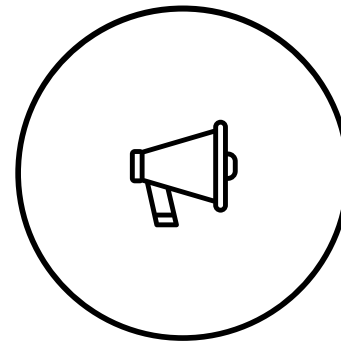

AUTOMATION

Our test automation scripts are focused on catching problems before they get big.

PERFORMANCE

We look at speed and reliability when we test your application for scalability.

INTEGRATION

All the pieces have to work together without getting in the way of innovation.

ACCEPTANCE

You should be able to get what you pay for. We make sure that happens.

Increase Quality   Assure consistency   Standardized quality across apps   3rd party verification   Audited quality output
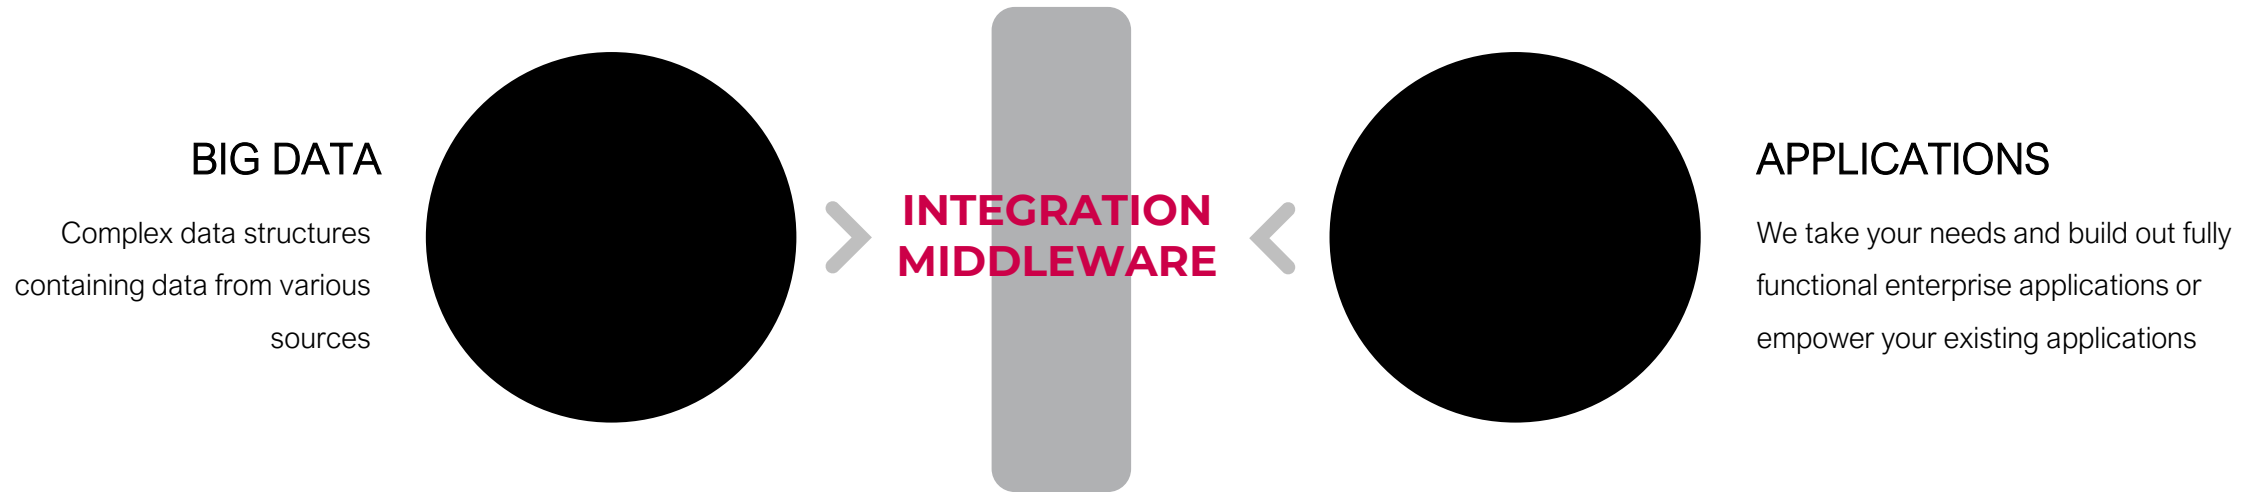

BIG DATA LAB

A dedicated development environment in the cloud, scalable and secure that can produce Proof of Concepts explicitly for experimentation with emerging technologies and big data.

TECHNOLOGIES

Selecting the right set of technologies for high value use cases

ARCHITECTURE

Develop future-state AI architecture

DATA

Store and analyze unstructured and high-volume data

AGILE BI

Deliver low-cost, high-performance, agile BI and data discovery

VISUALIZATION

Enable business intelligence reporting and self-serve capability

ML & AI Insights
